

Module 5 challenge

PYMACEUTICALS

Analysis

1. The mice with a drug regimen of Capomulin seem to have small Tumor Volume across the board.
2. The weight and age of the mice seem to make a difference as the smaller but older mice had larger Tumor Volume and the older but smaller mice had smaller Tumor volume.
3. The Placebo seemed to align consistently with the drug regimen of Ketapril and Naftisol.
4. There was no significant difference in regards to the Sex of the mice.
